

NHS Trafford CCG Testimonial

Trafford CCG is committed to reducing the gap in health outcomes between the most and least deprived communities in Trafford. While there are many factors impacting on health inequalities we recognise that as commissioners we need to ensure a strong awareness and understanding of the communities where inequalities are at their greatest.

To develop our awareness we engaged LMCP Care Link to design and deliver a cultural awareness programme which looked at culture specific issues that might impact on health outcomes. The programme has been delivered to all teams in the TCCC and has been well received, achieving the goal of raising awareness and doing so in an engaging and positive way.

We would have no hesitation in recommending LMCP Care Link as a well-informed , flexible and responsive organisation well suited to providing training and development activity in this field.
